Beyond the Obvious

Everyone sees the same picture. The difference is in the small detail left outside the frame, and that is where I look: for what others don't yet know they need to search for.

Four years of studying, researching, dismantling and building systems to understand how things actually work. I have given guest lessons at Israel's National Cyber Directorate. I know when to be the student, and whom to learn tradecraft from.

Professional Experience

Computer Store Manager and Field Technician, CPU | 06/2024 – 01/2025

Ran a computer store independently as acting owner. Matched computing solutions to customers, diagnosed and repaired computers, and handled faults and on-site technical service for business clients.

Component-Level Computer Technician, Lab10 | 09/2023 – 04/2024

Diagnosed and repaired complex laptop faults, including micro-soldering and motherboard work. Reinforced a professional lab that also takes cases referred by other technicians and service providers.

Stage and Audio-Visual Systems Technician, Stage Systems | 03/2022 – 10/2023

Set up, installed, tuned and dismantled complex sound, lighting and video systems. Integrated professional systems and resolved faults in the field.

Team Leader and Installation Crew Manager, Eckshtein Caesar | 2020 – 2022

Led crews installing stage, lighting, sound and video systems. Assigned tasks, coordinated field work, met deadlines and resolved faults in real time.

Founder, Owner and Manager of Two Fitness Facilities | 2017 – 2020

Built two businesses from scratch, from planning and designing the space to full operation. Managed payment systems, equipment maintenance, marketing, bookkeeping and customer training.

Career break: time abroad and recovery from injury | 2014 – 2017

Business and Geographic Intelligence Analyst, SCSM Ltd | 2008 – 2014

Worked with OSINT methods long before I knew the term. Competitor research, market mapping, geolocation, and social engineering with cover identities to collect business intelligence. The findings became reports and market-entry plans for the US and UK.

Research and Projects

OSINT and Intelligence Investigations

Give me a thread, even a barely existing one, and I know where to dig. People, companies, infrastructure, supply chains and relationship networks. I cross-check sources, separate facts from assessments, and deliver findings that can be re-run and verified.

Distributed AI Computing Infrastructure | self-initiated

Built a multi-server Linux environment with networks and virtual machines to run AI tools. Infrastructure design, systems integration and fault diagnosis.

Skills and Tools

Intelligence and research: geolocation, company and competitor research, relationship mapping, archives, source verification. OSINT, WEBINT, social engineering, Maltego, SpiderFoot, Obsidian.

Data analysis: Microsoft Office, Excel, Power BI, Tableau.

Systems and technology: Linux, Nmap, Wireshark, VMware, VirtualBox, KVM/QEMU, networks, servers, AI infrastructure.

Education, Training and Service

2025 – 2026 | OSINT studies, Reichman University and Google's AI Tech School

2022 – 2024 | Information Security and Infrastructure, T.O.M Institute

2023 | Computer Technician Training, Lab Ten

2007 – 2008 | MCSE and PC Technician studies, Ness Technologies

2001 – 2004 | Combat soldier, Paratroopers Brigade, IDF
